# 2027 Perennials

The new quart perennial line | 82 varieties

HOOSIER BOY by Schlegel Greenhouse

On the cover: Perennial salvia

Photo: Danziger

Schlegel Greenhouse · 705 Sprague Street, Indianapolis, IN 46217

# 2027 Perennials

New for spring 2027: a line of perennials in quart pots, chosen to be hardy to Zone 5 or colder, worth being excited about, and able to finish well in a quart. A few heuchera and sedum are grown in the 4.5-inch pot as well.

A quart is a young plant ready to go into the garden, at a price a gardener will try. It will not look as big on the bench as a two-gallon perennial, but it is bought for what it will become.

Current availability and pricing are always in the online ordering portal.

PLANNING THE SEASON

# Indiana spring weather

When the last frost usually comes, north to south. A median date means a frost after it happens one year in two; the later “safer” date is passed nine years in ten.

| LOCATION | LAST SPRING FROST | SAFER DATE | FIRST FALL FROST | ZONE |
|---|---|---|---|---|
| **South Bend** | May 1 | May 17 | Oct 19 | 6a |
| **Fort Wayne** | Apr 24 | May 10 | Oct 21 | 6a |
| **Lafayette** | Apr 26 | May 14 | Oct 18 | 6a |
| **Muncie** | Apr 16 | May 2 | Oct 25 | 6a |
| **Indianapolis** | Apr 15 | May 2 | Oct 26 | 6b |
| **Bloomington** | Apr 15 | May 3 | Oct 26 | 6b |
| **Columbus** | Apr 11 | Apr 30 | Oct 25 | 6b |
| **Evansville** | Apr 4 | Apr 19 | Oct 29 | 7a |

**These are long-term averages for planning, not a forecast or a guarantee. A frost after the safer date still comes about one year in ten.**

NOAA NCEI 1991–2020 U.S. Climate Normals, 32°F freeze dates by station (Muncie: 23 years of record). Zones: USDA 2023 Plant Hardiness Zone Map.

## Indianapolis in spring

| MONTH | AVG HIGH | AVG LOW | RAIN |
|---|---|---|---|
| **Mar** | 52°F | 33°F | 3.7 in. |
| **Apr** | 64°F | 43°F | 4.3 in. |
| **May** | 73°F | 54°F | 4.8 in. |
| **Jun** | 82°F | 63°F | 5 in. |

Indianapolis International Airport, NOAA NCEI 1991–2020 normals.

## When to plant out

- Purdue Extension's annual flower guide: set annuals out once frost danger is past, about May 1 in southern Indiana, May 15 in central and May 20 to 30 in northern Indiana.
- Wait for soil above 60°F before sowing annual flower seed outdoors (Purdue Extension).
- Tender plants want nights of about 50°F. Peppers, melons and squash want 60 to 65°F, at least two weeks after the average last frost (Purdue Extension).
- Mother's Day, May 9 in 2027, is the usual planting signal in central Indiana. It falls after the safer date from Indianapolis south, but before it in Fort Wayne, Lafayette and South Bend.

ON RECORD AT INDIANAPOLIS

The latest spring freeze on record at Indianapolis came on May 27, 1961. (NWS Indianapolis)

The latest measurable snow at Indianapolis fell on May 9, 1923: the same date as Mother's Day 2027. (NWS Indianapolis)

Indianapolis records run from 106°F (July 14, 1936) to -27°F (January 19, 1994). (NWS Indianapolis)

DID YOU KNOW?

Luther Burbank began breeding the Shasta daisy in 1884 and introduced it in 1901, naming it for California's snowy Mount Shasta. He grew more than half a million flowers to find the best.
