Pansies 2027

Pansies and violas are the first color of spring. They grow best in cool weather, take frost in stride and are the plants that fill garden centers in March and April, weeks before the frost-tender annuals can go out. They slow down once summer heat arrives, and the hardiest types come back in fall or after the winter.

This book covers every pansy and viola Schlegel Greenhouse is growing for spring 2027, ready from week 9 to week 12: upright bedding pansies in flats, Jr. market baskets and 6-inch pots, the spreading Wave pansies in hanging baskets, and Spring Matrix in 12-inch bowls. The Japanese Elegance pansies have a book of their own.

The book is organized by series, the way they are bred and sold: what sets each series apart, then every variety in it, with the pot sizes it is grown in.

PLANNING THE SEASON

Indiana spring weather

When the last frost usually comes, north to south. A median date means a frost after it happens one year in two; the later “safer” date is passed nine years in ten.

LOCATION	LAST SPRING FROST	SAFER DATE	FIRST FALL FROST	ZONE
South Bend	May 1	May 17	Oct 19	6a
Fort Wayne	Apr 24	May 10	Oct 21	6a
Lafayette	Apr 26	May 14	Oct 18	6a
Muncie	Apr 16	May 2	Oct 25	6a
Indianapolis	Apr 15	May 2	Oct 26	6b
Bloomington	Apr 15	May 3	Oct 26	6b
Columbus	Apr 11	Apr 30	Oct 25	6b
Evansville	Apr 4	Apr 19	Oct 29	7a

These are long-term averages for planning, not a forecast or a guarantee. A frost after the safer date still comes about one year in ten.

NOAA NCEI 1991–2020 U.S. Climate Normals, 32°F freeze dates by station (Muncie: 23 years of record). Zones: USDA 2023 Plant Hardiness Zone Map.

When to plant out

- Purdue Extension's annual flower guide: set annuals out once frost danger is past, about May 1 in southern Indiana, May 15 in central and May 20 to 30 in northern Indiana.
- Wait for soil above 60°F before sowing annual flower seed outdoors (Purdue Extension).
- Tender plants want nights of about 50°F. Peppers, melons and squash want 60 to 65°F, at least two weeks after the average last frost (Purdue Extension).
- Mother's Day, May 9 in 2027, is the usual planting signal in central Indiana. It falls after the safer date from Indianapolis south, but before it in Fort Wayne, Lafayette and South Bend.

ON RECORD AT INDIANAPOLIS

The latest spring freeze on record at Indianapolis came on May 27, 1961. (NWS Indianapolis)

The latest measurable snow at Indianapolis fell on May 9, 1923: the same date as Mother's Day 2027. (NWS Indianapolis)

Indianapolis records run from 106°F (July 14, 1936) to -27°F (January 19, 1994). (NWS Indianapolis)

Frizzle Sizzle is the ruffled pansy: 2.5 inch flowers with frilled petal edges on mounded plants 6–8 inches tall and 8–10 inches wide. The ruffling is strongest in cool weather, so it shows best in early spring. It sells best where customers see it up close: patio pots, entries and the front of a bed.
